TOXICOLOGY

Subject index of volume 132

A-gliadin; Coeliac disease; Gluten sensitive enteropathies; Gliadin peptides; Prolamin peptides; In vitro toxicology; Toxicity screening; Fetal intestines; Isolated cells; Cereals; Mannan; Oligomers of *N*-acetyl-glucosamine; Spermidine; Spermine; Novel foods; Genetically-modified plant foods **132**, 99

Aldehyde; Aldehyde dehydrogenase; Trichloroethylene; Methanol; Cytochrome P450 **132**, 9

Aldehyde dehydrogenase; Aldehyde; Trichloroethylene; Methanol; Cytochrome P450 **132**, 9

Alloxan; Metallothionein; Zinc; Pancreas; Exocrine; Islets **132**, 33

Amino acids; Thioacetamide; Liver cirrhosis; Nutritional status; Pair-fed; Net uptake **132**, 155

Antifungal agent; D0870; QT prolongation; Sudden death; TdP; Dogs **132**, 187

Antioxidants; Vitamin E; Reproduction; Testes oxidation **132**, 179

Apoptosis; DNA fragmentation; Testes; Deltamethrin; Nitric oxide; Nitric oxide synthase inhibitor **132**, 1

BI-6; Soman; Pralidoxime; Obidoxime; Methoxime; HI-6; RaL **132**, 111

Bromobenzene; Garlic; Hepatotoxicity; Glutathione; Liver slices **132**, 215

Cadmium; Minophagen; Glycyrrhizin; Glycine; Nephrotoxicity; Hepatotoxicity; Lipid peroxidation; Glutathione. **132**, 139

Cereals; Coeliac disease; Gluten sensitive enteropathies; Gliadin peptides; Prolamin peptides; In vitro toxicology; Toxicity screening; Fetal intestines; Isolated cells; Mannan; Oligomers of *N*-acetyl-glucosamine; Spermidine; Spermine; A-gliadin; Novel foods; Genetically-modified plant foods **132**, 99

Coeliac disease; Gluten sensitive enteropathies; Gliadin peptides; Prolamin peptides; In vitro toxicology; Toxicity screening; Fetal intestines; Isolated cells; Cereals; Mannan; Oligomers of *N*-acetyl-glucosamine; Spermidine; Spermine; A-gliadin; Novel foods; Genetically-modified plant foods **132**, 99

Contact sensitisation; Respiratory sensitisation; RT-PCR; Interleukin 12 **132**, 57

Copper; Metallothionein; LEC rat; Liver; Kidney; Wilson's disease **132**, 201

Cultured neurons; Methyl mercury; Inorganic mercury; Zinc; Neurotoxicity; Metallothionein **132**, 167

Cytochrome P450; Aldehyde dehydrogenase; Aldehyde; Trichloroethylene; Methanol **132**, 9

D0870; Antifungal agent; QT prolongation; Sudden death; TdP; Dogs **132**, 187

Deltamethrin; Apoptosis; DNA fragmentation; Testes; Nitric oxide; Nitric oxide synthase inhibitor **132**, 1

DNA fragmentation; Apoptosis; Testes; Deltamethrin; Nitric oxide; Nitric oxide synthase inhibitor **132**, 1

Dogs; D0870; Antifungal agent; QT prolongation; Sudden death; TdP **132**, 187

Exocrine; Metallothionein; Alloxan; Zinc; Pancreas; Islets **132**, 33

Fetal intestines; Coeliac disease; Gluten sensitive enteropathies; Gliadin peptides; Prolamin peptides; In vitro toxicology; Toxicity screening; Isolated cells; Cereals; Mannan; Oligomers of *N*-acetyl-glucosamine; Spermidine; Spermine; A-gliadin; Novel foods; Genetically-modified plant foods **132**, 99

Free radicals; Lead; Lipid oxidation; Iron; Phase separation **132**, 19

Fungicides; Glucuronidation; Nephrotoxicity; Rats; Succinimides **132**, 43

PII: S0300-483X(99)00022-0

Fungicides; Succinimides; Nephrotoxicity; Structure–nephrotoxicity relationships; Rats **132**, 127

Garlic; Bromobenzene; Hepatotoxicity; Glutathione; Liver slices **132**, 215

Genetically-modified plant foods; Coeliac disease; Gluten sensitive enteropathies; Gliadin peptides; Prolamin peptides; In vitro toxicology; Toxicity screening; Fetal intestines; Isolated cells; Cereals; Mannan; Oligomers of *N*-acetyl-glucosamine; Spermidine; Spermine; A-gliadin; Novel foods **132**, 99

Germanium; Kinetics; Tissue distribution **132**, 147

Gliadin peptides; Coeliac disease; Gluten sensitive enteropathies; Prolamin peptides; In vitro toxicology; Toxicity screening; Fetal intestines; Isolated cells; Cereals; Mannan; Oligomers of *N*-acetyl-glucosamine; Spermidine; Spermine; A-gliadin; Novel foods; Genetically-modified plant foods **132**, 99

Glucuronidation; Fungicides; Nephrotoxicity; Rats; Succinimides **132**, 43

Glutathione; Bromobenzene; Garlic; Hepatotoxicity; Liver slices **132**, 215

Glutathione.; Minophagen; Glycyrrhizin; Glycine; Cadmium; Nephrotoxicity; Hepatotoxicity; Lipid peroxidation **132**, 139

Gluten sensitive enteropathies; Coeliac disease; Gliadin peptides; Prolamin peptides; In vitro toxicology; Toxicity screening; Fetal intestines; Isolated cells; Cereals; Mannan; Oligomers of *N*-acetyl-glucosamine; Spermidine; Spermine; A-gliadin; Novel foods; Genetically-modified plant foods **132**, 99

Glycine; Minophagen; Glycyrrhizin; Cadmium; Nephrotoxicity; Hepatotoxicity; Lipid peroxidation; Glutathione. **132**, 139

Glycyrrhizin; Minophagen; Glycine; Cadmium; Nephrotoxicity; Hepatotoxicity; Lipid peroxidation; Glutathione. **132**, 139

Hepatotoxicity; Bromobenzene; Garlic; Glutathione; Liver slices **132**, 215

Hepatotoxicity; Minophagen; Glycyrrhizin; Glycine; Cadmium; Nephrotoxicity; Lipid peroxidation; Glutathione. **132**, 139

HI-6; Soman; Pralidoxime; Obidoxime; Methoxime; BI-6; RaL **132**, 111

Immunotoxicity; Meso-2,3-dimercaptosuccinic acid (DMSA); Lead acetate **132**, 67

Inorganic mercury; Methyl mercury; Zinc; Neurotoxicity; Metallothionein; Cultured neurons **132**, 167

Interleukin 12; Contact sensitisation; Respiratory sensitisation; RT-PCR **132**, 57

In vitro toxicology; Coeliac disease; Gluten sensitive enteropathies; Gliadin peptides; Prolamin peptides; Toxicity screening; Fetal intestines; Isolated cells; Cereals; Mannan; Oligomers of *N*-acetyl-glucosamine; Spermidine; Spermine; A-gliadin; Novel foods; Genetically-modified plant foods **132**, 99

Ionizing radiation; Metallothionein; Radiation protection; UV radiation; Review **132**, 85

Iron; Lead; Lipid oxidation; Free radicals; Phase separation **132**, 19

Islets; Metallothionein; Alloxan; Zinc; Pancreas; Exocrine **132**, 33

Isolated cells; Coeliac disease; Gluten sensitive enteropathies; Gliadin peptides; Prolamin peptides; In vitro toxicology; Toxicity screening; Fetal intestines; Cereals; Mannan; Oligomers of *N*-acetyl-glucosamine; Spermidine; Spermine; A-gliadin; Novel foods; Genetically-modified plant foods **132**, 99

Kidney; Copper; Metallothionein; LEC rat; Liver; Wilson's disease **132**, 201

Kinetics; Tissue distribution; Germanium **132**, 147

L-arg; Lead; L-NAME; Nephrotoxicity; Nitric oxide **132**, 119

Lead; L-arg; L-NAME; Nephrotoxicity; Nitric oxide **132**, 119

Lead; Lipid oxidation; Iron; Free radicals; Phase separation **132**, 19

Lead acetate; Immunotoxicity; Meso-2,3-dimercaptosuccinic acid (DMSA) **132**, 67

LEC rat; Copper; Metallothionein; Liver; Kidney; Wilson's disease **132**, 201

Lipid oxidation; Lead; Iron; Free radicals; Phase separation **132**, 19

Lipid peroxidation; Minophagen; Glycyrrhizin; Glycine; Cadmium; Nephrotoxicity; Hepatotoxicity; Glutathione. **132**, 139

Liver; Copper; Metallothionein; LEC rat; Kidney; Wilson's disease **132**, 201

Liver cirrhosis; Thioacetamide; Nutritional status; Pair-fed; Amino acids; Net uptake **132**, 155

Liver slices; Bromobenzene; Garlic; Hepatotoxicity; Glutathione **132**, 215

L-NAME; Lead; L-arg; Nephrotoxicity; Nitric oxide **132**, 119

Mannan; Coeliac disease; Gluten sensitive enteropathies; Gliadin peptides; Prolamin peptides; In vitro toxicology; Toxi-Gliadin peptides; Prolamin peptides; In vitro toxicology; Toxicity screening; Fetal intestines; Isolated cells; Cereals; Oligomers of *N*-acetyl-glucosamine; Spermidine; Spermine; A-gliadin; Novel foods; Genetically-modified plant foods **132**, 99

Meso-2,3-dimercaptosuccinic acid (DMSA); Immunotoxicity; Lead acetate **132**, 67

Metallothionein; Alloxan; Zinc; Pancreas; Exocrine; Islets **132**, 33

Metallothionein; Copper; LEC rat; Liver; Kidney; Wilson's disease **132**, 201

Metallothionein; Methyl mercury; Inorganic mercury; Zinc; Neurotoxicity; Cultured neurons **132**, 167

Metallothionein; Radiation protection; UV radiation; Ionizing radiation; Review **132**, 85

Methanol; Aldehyde dehydrogenase; Aldehyde; Trichloroethylene; Cytochrome P450 **132**, 9

Methoxime; Soman; Pralidoxime; Obidoxime; HI-6; BI-6; RaL **132**, 111

Methyl mercury; Inorganic mercury; Zinc; Neurotoxicity; Metallothionein; Cultured neurons **132**, 167

Minophagen; Glycyrrhizin; Glycine; Cadmium; Nephrotoxicity; Hepatotoxicity; Lipid peroxidation; Glutathione. **132**, 139

Nephrotoxicity; Glucuronidation; Fungicides; Rats; Succinimides **132**, 43

Nephrotoxicity; Lead; L-arg; L-NAME; Nitric oxide **132**, 119

Nephrotoxicity; Minophagen; Glycyrrhizin; Glycine; Cadmium; Hepatotoxicity; Lipid peroxidation; Glutathione. **132**, 139

Nephrotoxicity; Succinimides; Structure–nephrotoxicity relationships; Rats; Fungicides **132**, 127

Net uptake; Thioacetamide; Liver cirrhosis; Nutritional status; Pair-fed; Amino acids **132**, 155

Neurotoxicity; Methyl mercury; Inorganic mercury; Zinc; Metallothionein; Cultured neurons **132**, 167

Nitric oxide; Apoptosis; DNA fragmentation; Testes; Deltamethrin; Nitric oxide synthase inhibitor **132**, 1

Nitric oxide; Lead; L-arg; L-NAME; Nephrotoxicity **132**, 119

Nitric oxide synthase inhibitor; Apoptosis; DNA fragmentation; Testes; Deltamethrin; Nitric oxide **132**, 1

Novel foods; Coeliac disease; Gluten sensitive enteropathies; Gliadin peptides; Prolamin peptides; In vitro toxicology; Toxicity screening; Fetal intestines; Isolated cells; Cereals; Mannan; Oligomers of *N*-acetyl-glucosamine; Spermidine; Spermine; A-gliadin; Genetically-modified plant foods **132**, 99

Nutritional status; Thioacetamide; Liver cirrhosis; Pair-fed; Amino acids; Net uptake **132**, 155

Obidoxime; Soman; Pralidoxime; Methoxime; HI-6; BI-6; RaL **132**, 111

Oligomers of *N*-acetyl-glucosamine; Coeliac disease; Gluten sensitive enteropathies; Gliadin peptides; Prolamin peptides; In vitro toxicology; Toxicity screening; Fetal intestines; Isolated cells; Cereals; Mannan; Spermidine; Spermine; A-gliadin; Novel foods; Genetically-modified plant foods **132**, 99

Pair-fed; Thioacetamide; Liver cirrhosis; Nutritional status; Amino acids; Net uptake **132**, 155

Pancreas; Metallothionein; Alloxan; Zinc; Exocrine; Islets **132**, 33

Phase separation; Lead; Lipid oxidation; Iron; Free radicals **132**, 19

Pralidoxime; Soman; Obidoxime; Methoxime; HI-6; BI-6; RaL **132**, 111

Prolamin peptides; Coeliac disease; Gluten sensitive enteropathies; Gliadin peptides; In vitro toxicology; Toxicity screening; Fetal intestines; Isolated cells; Cereals; Mannan; Oligomers of *N*-acetyl-glucosamine; Spermidine; Spermine; A-gliadin; Novel foods; Genetically-modified plant foods **132**, 99

QT prolongation; D0870; Antifungal agent; Sudden death; TdP; Dogs **132**, 187

Radiation protection; Metallothionein; UV radiation; Ionizing radiation; Review **132**, 85

RaL; Soman; Pralidoxime; Obidoxime; Methoxime; HI-6; BI-6 **132**, 111

Rats; Glucuronidation; Fungicides; Nephrotoxicity; Succinimides **132**, 43

Rats; Succinimides; Nephrotoxicity; Structure–nephrotoxicity relationships; Fungicides **132**, 127

Reproduction; Vitamin E; Antioxidants; Testes oxidation **132**, 179

Respiratory sensitisation; Contact sensitisation; RT-PCR; Interleukin 12 **132**, 57

Review; Metallothionein; Radiation protection; UV radiation; Ionizing radiation **132**, 85

RT-PCR; Contact sensitisation; Respiratory sensitisation; Interleukin 12 **132**, 57

Soman; Pralidoxime; Obidoxime; Methoxime; HI-6; BI-6; RaL **132**, 111

Spermidine; Coeliac disease; Gluten sensitive enteropathies; Gliadin peptides; Prolamin peptides; In vitro toxicology; Toxicity screening; Fetal intestines; Isolated cells; Cereals; Mannan; Oligomers of *N*-acetyl-glucosamine; Spermine; A-gliadin; Novel foods; Genetically-modified plant foods **132**, 99

Spermine; Coeliac disease; Gluten sensitive enteropathies; Gliadin peptides; Prolamin peptides; In vitro toxicology; Toxicity screening; Fetal intestines; Isolated cells; Cereals; Mannan; Oligomers of *N*-acetyl-glucosamine; Spermidine; A-gliadin; Novel foods; Genetically-modified plant foods **132**, 99

Structure–nephrotoxicity relationships; Succinimides; Nephrotoxicity; Rats; Fungicides **132**, 127

Succinimides; Glucuronidation; Fungicides; Nephrotoxicity; Rats **132**, 43

Succinimides; Nephrotoxicity; Structure–nephrotoxicity relationships; Rats; Fungicides **132**, 127

Sudden death; D0870; Antifungal agent; QT prolongation; TdP; Dogs **132**, 187

TdP; D0870; Antifungal agent; QT prolongation; Sudden death; Dogs **132**, 187

Testes; Apoptosis; DNA fragmentation; Deltamethrin; Nitric oxide; Nitric oxide synthase inhibitor **132**, 1

Testes oxidation; Vitamin E; Antioxidants; Reproduction **132**, 179

Thioacetamide; Liver cirrhosis; Nutritional status; Pair-fed; Amino acids; Net uptake **132**, 155

Tissue distribution; Kinetics; Germanium **132**, 147

Toxicity screening; Coeliac disease; Gluten sensitive enteropathies; Gliadin peptides; Prolamin peptides; In vitro toxicology; Fetal intestines; Isolated cells; Cereals; Mannan; Oligomers of *N*-acetyl-glucosamine; Spermidine; Spermine; A-gliadin; Novel foods; Genetically-modified plant foods **132**, 99

Trichloroethylene; Aldehyde dehydrogenase; Aldehyde; Methanol; Cytochrome P450 **132**, 9

UV radiation; Metallothionein; Radiation protection; Ionizing radiation; Review **132**, 85

Vitamin E; Antioxidants; Reproduction; Testes oxidation **132**, 179

Wilson's disease; Copper; Metallothionein; LEC rat; Liver; Kidney **132**, 201

Zinc; Metallothionein; Alloxan; Pancreas; Exocrine; Islets **132**, 33

Zinc; Methyl mercury; Inorganic mercury; Neurotoxicity; Metallothionein; Cultured neurons **132**, 167
